Alcidion Selected as Preferred EPR Supplier by University Hospitals Sussex

- University Hospitals Sussex NHS Foundation Trust (UHSx) has selected Alcidion as the preferred supplier for its new Electronic Patient Record (EPR) system
- Preferred supplier selection follows a competitive tender process
- Total Contract Value (TCV) is under negotiation; anticipated to be in excess of A\$35M depending on the number of modules included, over a minimum 7-year period
- Upon finalising the contract, Alcidion is targeting deployment commencement in Q4 FY26
- UHSx is an existing Alcidion customer, using our Patienttrack solution for Observations and Assessments

Melbourne, Victoria: Alcidion Group Limited (ASX: ALC) today advises it has been selected as the preferred EPR supplier by University Hospitals Sussex NHS Foundation Trust (UHSx) for its new Electronic Patient Record (EPR) system. UHSx is located in the south of the UK and forms part of the Sussex Integrated Care System (ICS). They provide hospital and community health care for approximately a million people in Sussex. It is one of the largest acute trusts in the UK, with seven hospitals hosting more than 1.5 million outpatient appointments, A&E visits and surgery cases annually, employing nearly 20,000 staff.

Alcidion will deploy their flagship Miya Precision platform, including Miya Observations and Assessments (Patienttrack), which is already live at the Trust. The EPR solution will provide clinicians real-time access to patient records whilst streamlining patient flow and improving clinical decision-making processes.

Following a competitive tender process, we will now finalise the contract prior to commencing deployment of Miya Precision which is expected to commence in Q4 FY26.

Alcidion Group Managing Director, Kate Quirke, said: “We are excited to have been selected by UHSx as their preferred EPR supplier. This builds on a long-standing relationship Alcidion have with UHSx where they have been using Miya Observations and Assessments (Patienttrack) for many years. UHSx’s purpose for the EPR procurement is to implement a single, integrated digital platform that improves patient care, supports regional integration, drives operational efficiency, and delivers long-term social and research benefits. Miya Precision is ideally placed to deliver on this vision working alongside the implementation teams and clinical staff at UHSx to ensure there is long term benefit to the people of this region.”

About Alcidion

Alcidion Group Limited (Alcidion) has a simple purpose, that is, to transform healthcare with proactive, smart, intuitive technology solutions that improve the efficiency and quality of patient care in healthcare organisations, worldwide.

Alcidion offers a complementary set of software products and technical services that create a unique offering in the global healthcare market. Based on the flagship product, Miya Precision, the solutions aggregate meaningful information to centralised dashboards, support interoperability, facilitate communication and task management in clinical and operational settings and deliver Clinical Decision Support at the point of care; all in support of Alcidion's mission to improve patient outcomes.

Since listing on the ASX in 2016, Alcidion has acquired multiple healthcare IT companies and expanded its foothold in the UK, Australia, and New Zealand to now service over 400 hospitals and 87 healthcare organisations, with further geographical expansion planned.

With over 20 years of healthcare experience, Alcidion brings together the very best in technology and market knowledge to deliver solutions that make healthcare better for everyone.
